How to use

The gate app for gate staff

Suhar Festival 20 November 2026 to 2 March 2027 Suhar

Run by the North Al Batinah Governor's Office

3 The gate app for gate staff

Gate staff

The “Mawsim Gate” app runs on the scanning device at the entrance. Install it on Android from the fixed link below, or open the web version on a tablet or computer. The link never changes between versions: open it whenever a new version is out and install it over the old one.

Android, APK file

v2-mawsim.awj.om/downloads/mawsim-gate.apk

Download

Web version

For iPhone, iPad and computers

v2-mawsim-gate.awj.om

The first time you install the APK, allow your browser to install apps if the phone asks, then tap “Install” and “Open”.

Pair the device with a gate

1. Ask the ticket and gates manager for a pairing code. They create it in the admin panel under Gates, then Scanning devices, then Pair new device. The code works once, for ten minutes.
2. On **“Pair this device”** tap **“Scan pairing QR”**, or type the code under **“Pairing code”**.
3. Leave **“Server URL”** and **“Organizer (tenant)”** as they are, and enter a **“Device name”**.
4. Choose a **“Kiosk exit PIN”** of 4 to 8 digits, repeat it, then tap **“Pair device”**.

2 Pair this device

Scanning tickets at the entrance

1. Scan the visitor's ticket code with the camera or a barcode scanner, or type its number under **“Enter ticket number”**.
2. A green **“ADMIT”** screen shows for a valid ticket and the visitor goes in. A used ticket, or one for another day, is refused with the reason.
3. If the internet drops, keep scanning: the device accepts valid tickets and syncs them when it is back online.
